Visibility is a very, very dark game. It is very hard (nearly impossible) to see the structure of the levels. So the game is really harder than i thought it would be. It is entertaining and really worth the money. You have to be patient and concentrated, to make it through the levels! I played already 30 minutes and only made it trough the first two proper levels. So it will take some time to finish the game. I already love this game and it's beautiful soundtrack!

But there are still some things i miss:

- Fullscreen
- A longer soundtrack

But i think this will come with patches in the near future. ^^ I highly recommend to play this game at night for relaxing gameplay ;)

Edit: Fullscreen got patched!. *Loads game up*

-10V/10 Would buy again. Haven't delved to deeply in to the game but so far it looks like at lot of fun.. Haven't delved to deeply in to the game but so far it looks like at lot of fun.. This game is just as much fun to play as it was when it came out back in the mid 2000s.

For me it works fine on Windows 10 and I've never had any problem while running the game, although others have encountered difficulties on this OS.

It's definitely worth a try.. I used to play this game all the time when I was young on the XBox 360.

Now I have it in my collection till the end of time. Or Steam. And I love it.. One of the few MMORPG's left that didn't forget about being a role-playing game

A short puzzle game, it was fun and I enjoyed it. Install > Play > Exit Game > Uninstall

The quickest way to farm Steam achievements! Only purchase this game for achievements! Does not have any real gameplay!.
Cheapest game i've seen in a while...
Not just the price...

In my opinion not worth the few cents.... Maybe a little bit of R&D needed, finishing the tutorial left me with the information
sig of the piece all over the screen and it made it impossible to do anything...

I can't recommend this game in it's current state even though it gave me a big amount of laughs as soon as the dancer attacked,
that was hilarious and worth the money but I still wouldn't recommend it to anyone in its current state.. Easy 100% V 10min.
This game is fantastic.

Pardon Our Dust!. **Message from Zag:**

Hey, DETOUR players!

(All four of you.)

We made this game *a long time ago*. I was around 18 or 19 when this released, and I'm 28 now. The game changed hands once
for about a 2 year period (it wasn't making money, and another company wanted to see if they could get some dollars out of it --
so I said sure!)

Anyway, it's back in my possession, and it's all back to where it was in term of *weird store stuff* and *endless giveaways*.

If you want to pick it up, it's fun, but there's no official support for the game's future. Maybe I'll make a sequel one day! It has
some really unique gameplay, and I'm glad we got a chance to create it.

If you have any questions about the game, hit me up.

As for now, I'm working on Unfortunate Spacemen, on Steam, so follow my new stuff I'm doing on twitter; [@geoffkeene](https://twitter.com/geoffkeene) or
[@UnfortSpacemen](https://store.steampowered.com/app/228380/Unfortunate_Spacemen/) for the new game.

HONK HONK.
